

KEY FEATURES & BENEFITS :

- **Single motor lift and recline mechanism with “tilt in space” motion**
 - This lift and recline motion maintains the angle between the seat and backrest when reclined or during lifting
 - This provides a safe and easy way for the user to shift their weight and body position by redistributing weight from the pelvis to the back.
 - The potential benefit is a reduction of pressure sores, increased comfort, and increased sitting tolerance.
- **Excellent stability** in the lift position
- Upholstered mechanism tested at **130 kg user weight**

	Standard
Seat frame width (mm)	500, 550, 600
Seat height (mm)	460
Seat depth (mm)	500
Capacity (kg)	130
Foot rest capacity (kg)	60
